

Proposed Agenda for HDOH/Region 9 EPA Meetings in late February or early March:

Day 1, AM:

- Goals for meeting
- Presentation and discussion on area-wide soil arsenic investigations
- Presentation and discussion on DoD housing re-development pesticide investigations

Day 1, PM:

- Presentation and discussion on use of bioaccessibility testing for soil arsenic risk assessment
- Presentation and discussion on use of technical chlordane vs chlordane data for assessment, and consideration of cumulative risk for multiple contaminants found at housing re-development sites

Day 2, AM:

- Presentation and discussion on use of multi-increment sampling vs discrete sampling for site characterization and evaluation of site remediation

Day 2, PM:

- Presentation and discussion on use of SPLP tests to evaluate leaching of contaminants from soil
